### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Vastine on 12/19/07..

The application has been amended as follows:

On line 2 of claim 12, after "from", ---step--- has been inserted.

On line 2 of claim 13, "1)" has been replaced with ---step e)---.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process, as called for in claim 1, for production of 1-octene by three steps (1) conversion of butadiene and methanol to 1-methoxy-2,7-octadiene, (2) hydrogenating 1-methoxy-2,7-octadiene to 1-methoxyoctane, and then (3) dissociating 1-methoxyoctane to 1-octene. The closest art of record - Bohley et al (WO 92/10450) - discloses a process of producing 1-octene by the three steps substantially the same as the claimed process (see the abstract). However, the reference is totally silent as to steps (e) and (f) recited in the claimed process (see the entire patent for details). Further, as in specification and the examples, applicants disclose and show that a process without steps e) and f) with a help of an overhead decanter has a loss of 1% octane. This octane also contains about 5600 ppm of residual water which would have to be removed in additional steps (page 10, lines 13-24; examples, namely comparative example 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
